

Clive Wilby Gemstone designs

Clive Wilby is the Director of Gemstone Designs located in Derbyshire in England.

GEMSTONE DESIGNS today has 400 clients in Great Britain. GD provides both independent jewellery shops and private independents.

Clive Wilby has been working in this field for 8 years now and has been using  for a few months.

Before choosing 3DESIGN Clive Wilby tested various existing solutions but found them too expensive and moreover they did not answer his needs. For example, he did not find them relevant enough for **Milling applications** and **3D Modelling**.

Clive finds **3DESIGN really dedicated to jewellery**, he especially appreciates the **Draft Kit function** as he often sketches by hand. Finding a solution that could import his models easily in a 3D interface was a fundamental criterion for him. He is also keen on the **Duplication** and **Mirroring functions** which allow him to work faster and be more productive.

*“3DESIGN helps me to find **more original ideas**. You can **design very quickly** for pieces that would take ages to make. **It is opening up new design areas** that we would otherwise not be able to see...”*

Clive Wilby attended last 3DESIGN seminar to increase his design abilities with the software. What attracted him most were the **short cuts efficiency** and the **tremendous Sweeping possibilities**. He enjoyed this 2-day training and spent time sharing ideas and work methods with the other attendees.

To conclude his experience with 3DESIGN Clive declared:

*“**3DESIGN is an excellent tool**, it seems to have **endless possibilities**. I know I have even more and more to discover with it and that is very exciting!”*
