

COMGRAPH:

Thailand supports the computer-aided-design use for its jewelry industry

From Comgraph, 3DESIGN reseller in Bangkok

The Department of Industrial Promotion (DIP) is a governmental institute in Thailand that offers a variety of services to industrial entrepreneurs as well as the general public. The Department of Industrial Promotion recommends policies and strategies to develop the capabilities of small- and medium-scale industries (SME) as part of Thailand's social and economic development.

This institute emphasizes the importance of personnel development in both industrial and handicraft sector such as the jewelry one. Thereby, it provides training and seminars that suits an extensive range of target audiences of which from technical know-how designed for entrepreneurs and new investors, management, technology, to upgrading of industrial and handicraft skills especially toward new technologies.

The Gem & Jewelry Industries Division organized the 27-29th of November 2007 a 3-days seminar in Bangkok. The purpose was to let the 20 attendees discover and use a 3D CAD software for jewelry design. **Comgraph**, our local **3DESIGN** reseller in Bangkok, helped the students to feel ease of use with **3DESIGN CAD** software and make them able to create good models at the end of the training. After this first step, some students decided to go further into detail at **Comgraph's** offices. They may join up with the extending number of **3DESIGN** users in Thailand...
