3DESIGN contest winner: 2nd prize

Yaret Catak, 3DESIGN contest 2nd prize winner

Our official 3DESIGN reseller in Turkey: Sedat Kilic, from 3B DIZAYN Ltd interviewed for us Yaret Catak. Yaret C. is the lucky winner of a six-month 3DESIGN license, one of the second prizes of the April 3DESIGN beginners contest. For more information about 3DESIGN in Turkey, please visit: www.3bdesign.com.tr
Read on for Yaret's interview:

What is your job and activity?

I work in the jewelry market. I deal with manufacturing, sales and other aspects...

What kind of jewels do you design?

I design 18 karat models exclusively. But I create all kinds of jewels: ring, earring, necklace...

Do you have your own collection and how do you distribute it? or do you design for private customers or retailers?

We have 12 different collections and we have been creating private designs. We are especially presenting the designs directly to the end-users.

Why did you need to work with software?

Many reasons pushed me towards new technologies but my goals were really to improve quality, speed and also to create

The winning model

How did you first hear about 3DESIGN?

I have visited the web site and then met the 3B DIZAYN company staff at the TATEF exhibition in Turkey.

Have you tried other solutions before 3DESIGN?

Yes, I actually tried various such as Rhino, Matrix and JewelCad.

What made the difference with 3DESIGN?

3DESIGN is really easy to use. The Ray-tracing and rendering module are of quality and the parametric technology is an absolute must have for any designer if you invest in software.

When did you first try it?

I started to use 3DESIGN in March 2005. The contest allowed me to download it from the web, to start using and creating with it and now I won a license!

What do you think about it?

My impressions about the software are really positive. I believe it is one of the best software solutions on the market.

Which functions do you like/use the most?

Parametric technology allows more flexibility during the design process and the Ray-tracing functionality permits to visualize the creation of your dreams. I think I will be using more and more of the Booleen operations, the Extrude function and the Sweeping Wizard.

What benefits have 3DESIGN already brought you?

I am already saving a lot of time designing and it is truly a tool that helps your creativity broaden.

If you had only one sentence to describe 3DESIGN?

Powerful software soon to be essential for modern jewellers.
